
Plan Revision Sheets

Design Manual**Chapter 1****General Information**

Originally Issued: 02-04-11

Revised: 03-18-24

Plans occasionally require a few revisions after field crews have had a chance to review them. Tabulation [111-23](#) is used to keep track of these revisions. This tabulation is to include all changes and corrections to the original plans. A short description of each change and a reason for the change should be included. In addition, the revision date should be shown on the sheets that have been revised.

Tabulation [111-23](#) is placed on a sheet called the Plan Revision Sheet. This sheet is placed after the Title and Location Map Sheets and will typically be the last of the A sheets. The Sample Plan Revision Sheet provides an example.

Section [1E-3](#) provides more information regarding the procedures used to make revisions to final project plans.
