Description of intended schedule and sequence of major land disturbing and erosion/sediment control activities, including number of mobilizations.:

Include staging and maintenance, method for winter shutdown and removal of temporary measures (if required for the project). Describe any additional measures that are needed due to late season work.

Describe measures necessary to control erosion based on your schedule or sequence of operations. Explain how you plan to implement erosion control plan in stages. Indicate measures that must be in place before grading begins.

Based on your staging, are there areas where additional erosion control beyond that shown in the plans is anticipated? If so, provide information.

Include proactive measures and sequencing to protect critical areas.

Consider if there will be different crews performing different items.

Other pollution prevention measures (such as measures for dewatering, stockpiles, concrete washout, construction entrances, fuel tanks or other SPCC items, etc.):

Describe dewatering methods and locations. What controls will be used to manage discharge?

Provide information regarding location and protection of stockpiles.

Plan to prevent discharge of concrete washout and minimize off-site tracking.

Other pollution prevention measures, such as Spill, Prevention, Control, and Countermeasures (SPCC) for fuel tanks?

Updates:

Update ECIP to address changes in the order of operations or staging, weather changes, or any other changes required to comply with permit requirements.

Update ECIP to address changes in the number of mobilizations.
