

GENERAL NOTES:

Alternate anti-vortex device configurations may be utilized upon approval of the Jurisdictional Engineer.

- ① See sheet 2 for dimensions of cylinder support bars, top plate, and top stiffener.
- ② Firmly attach the anti-vortex cylinder to the top of the riser by welding or other means.
- ③ Corrugated metal or 1/8 in. steelplate cylinder and top.
- ④ Pressure relief holes may be omitted if ends of corrugations are left fully open when the top is attached.

Notes: 1. The criterion for sizing the cylinder is that the area between the inside of the cylinder and the outside of the riser is equal to or greater than the area inside the riser. Therefore, the above table is invalid for use with concrete pipe risers. 2. Corrugation for 12"-36" pipe measures 2 2/3" X 1/2"; for 42"-84", the corrugation measures 5" X 1" or 3" X 1". 3. C - corrugated; F - flat.
