

## Structural Steel – Project Site Inspection Report

Description of Structure \_\_\_\_\_

Contractor \_\_\_\_\_

Sub-Contractor \_\_\_\_\_

Fabricator \_\_\_\_\_

Inspected By \_\_\_\_\_

Location of Inspection \_\_\_\_\_

County \_\_\_\_\_

Date Reported \_\_\_\_\_

Project No. \_\_\_\_\_

Date Shipped \_\_\_\_\_

Designer \_\_\_\_\_

Grade of Steel \_\_\_\_\_

Design No. \_\_\_\_\_

The material inspection of the items indicated includes, but is not limited to, a check of the following: visible defects or damage, straightness, presence of welds, coatings, hardware, final fabricated dimensions, and the general appearance. All items, where checked, were found to comply with current Department of Transportation Standard Specifications, Supplemental Specifications and design drawings unless otherwise noted in this report.

All items are from approved sources, where applicable.

The Mill Test Certifications were checked and found to comply with the applicable specifications for the grade of steel specified. The heat numbers found corresponded with the Mill Test Certifications.

All products of iron, steel, or a coating of steel shall meet the requirements of IM 107, Buy America.
