Requirements for Submitting Supplemental and Developmental Specifications in Masterworks

Supplemental Specifications are specifications adopted subsequent to the publication of the Standard Specifications book. They involve new construction items or changes to Standard Specifications. They only apply to a project when noted in the proposal form.

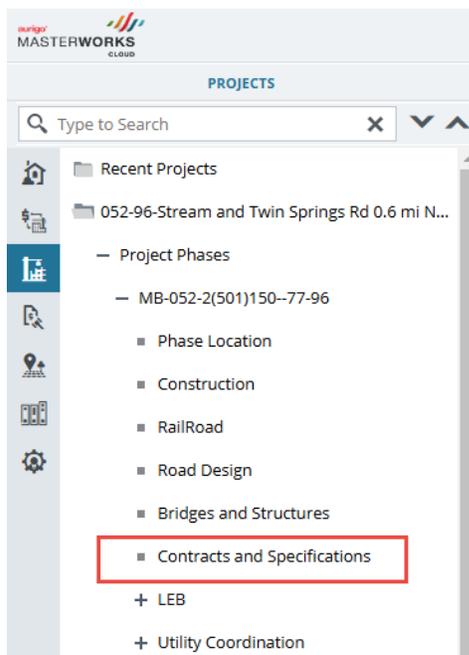

Developmental Specifications are additions and revisions to the standard, general supplemental, and supplemental specifications covering the development of new construction items or changes to a process. They only apply to a project when noted in the proposal form.

In the event there are any questions please contact the Specifications Section.

SS and DS Submittal for State projects

On or before “Plan Turn-in” day, supplemental specifications and developmental specifications for projects shall be entered into Masterworks.

Supplemental specifications and developmental specifications shall be selected for each phase (project) in the Contracts and Specifications form under the phase (project) number.

DS AND SS DETAILS

Number	Title
DS-23013	Fiber Reinforced Polymer Repair for Concrete Containment of Collision Damaged Pretensioned Prestressed Concrete Beams
Add	Delete

No approval is required by the Specifications Section for use of an SS or DS, but DS controllers should be notified of their use for review.

SS and DS Submittal for Local Systems and Systems Planning Projects

For Local Systems and Systems Planning projects, supplemental and developmental specifications assigned in TPDev 2020 prior to Contracts and Specifications Bureau turn-in day will transfer over to Masterworks.
